

Team 2 - Billy's Amazing Team

Member Names: Mitchel Bekink, Alyx Bruno-Bamford, Ashley Bryan, Rajul Chawla, Bosco Lau, Kacey Van Der Walt, Chris Grzywacz

Introduction (3b)

3rd-party libraries/assets and licenses

The only new assets used were created by ourselves, meaning there are no licenses for these assets.

The licenses used by the original project were Apache 2.0 (gradle, libgdx), and BSD 3-Clause (lwjgl3). Their assets were created by members of the team and are thus licensed for use in this project.

We used some new libraries for testing. These were JUnit 5 (Eclipse Public License v2.0) and Mockito (MIT license).

These licenses (Eclipse Public License 2.0, MIT) impose minimal restrictions on how we utilise these libraries and are compatible with the requirements of the project. It allows for us to focus more on development rather than legal implications.

Unimplemented required features

The requirements we did not implement are in the table below.

ID	Description	Implementation
UR_UPGRADE	The ability for the user to upgrade buildings	No
UR_ACCESSABILITY_SETTINGS	The user can choose from some accessibility setting	No
UR_KEYBINDS	The user can use keybinds to quickly perform actions	No
FR_COLOUR_BLIND_MODE	The system allows the user to select if they would like a colourblind mode to be enabled	No
FR_MOUSE_SENSITIVITY_SLIDER	The system allows the user to choose a mouse sensitivity	No
FR_UPGRADE_SATISFACTION_GAIN	When a building's upgrade has finished constructing, satisfaction will increase for a period of time	No, due to UR_UPGRADE
FR_CONSTRUCTION_SATISFACTION_LOSS	Building/upgrading a building during term time will result in satisfaction loss for a period of time	Partial, due to UR_UPGRADE
