

Team 2 - Billy's Amazing Team

Member Names: Mitchel Bekink, Alyx Bruno-Bamford, Ashley Bryan, Rajul Chawla, Bosco Lau, Kacey Van Der Walt, Chris Grzywacz

Introduction:

This document provides a more in depth description of manual tests that were carried out to test our code when automated tests were either not possible or not preferable to test a given requirement.

Manual Testing Table:

ID	Related Requirement	Description	Outcome
T1	UR_DISPLAY_TIMER	We ran the game and checked if the timer was visible.	PASSED
T2	UR_BUILDING_COUNTER, FR_BUILDING_COUNTER	We ran the game and checked if the building counter showed the correct number of buildings.	PASSED
T3	UR_PAUSE	We ran the game and tried to pause at different times.	PASSED
T4	UR_SATISFACTION_METER	We ran the game and checked the satisfaction bar was visible and reflected the current satisfaction manually.	PASSED
T5	UR_SCOREBOARD	We ran the game and checked if the scoreboard was shown and that it saved between games.	PASSED
T6	FR_TIMER_DISPLAY	We ran the game and checked that the timer was displayed on screen and that time passed at the correct rate.	PASSED
T7	FR_SATISFACTION_BREAK_DOWN	We ran the game and ensured that the thoughts were displayed on screen.	PASSED
T8	FR_SATISFACTION_TRACK	We ran the game and ensured the satisfaction bar marked where the satisfaction would end up over time.	PASSED
T9	FR_SATISFACTION_PAUSE	We ran the game and hit pause and ensured the satisfaction didn't change.	PASSED
T10	FR_CALCULATE_SCORE	We ran the game and then checked that the score was shown at the end.	PASSED
T11	FR_DISPLAY_SCORES	We ran the game and checked that the score is shown at the end, and the satisfaction throughout	PASSED
T12	NFR_SYS_RESPONSE_SPEED	We ran the game and checked that the system responded to the player's clicks immediately	PASSED

		(knowing our reaction time is likely around 0.1s, so if it seems immediate to us it is likely less than a 0.1s delay)	
T13	NFR_COUNTER_VISIBILITY	We ran the game and ensured that the time taken for a building to update the building counter was less than 1 second.	PASSED
T14	NFR_TIMER_VISIBILTY	We ran the game and ensured that the timer remained visible throughout the entire game, regardless of what was on screen or whether it was paused or not.	PASSED
T15	NFR_SATISFACTION_METER_VISIBILITY	We ran the game and ensured that the satisfaction bar remained visible and readable throughout the entire game, regardless of what was on screen or whether it was paused or not.	PASSED
T16	NFR_READABLITILY	We ran the game and read all text on the screen, ensuring it was all in plain English. We checked the text constantly and all new text that appeared was checked.	PASSED
T17	NFR_EVENT_COOLDOWN	We ran the game and recorded the amount of time that passed between events, to ensure there was a cooldown.	PASSED
T18	NFR_MULTIPLE_CONSTRUCTION	We ran the game and placed as many buildings as possible at the same time, ensuring that the game allowed us to construct as many buildings at once as we liked.	PASSED
